

EDGEMERE DRIVE BRIDGE REPLACEMENT PROJECT

(BETWEEN WAKE DRIVE AND LONG POND ROAD)

MAY 2022

This informational newsletter will provide periodic updates (as needed) on the status of the Edgemere Drive Bridge Project and communicate upcoming construction activities to local residents.

CURRENT PROJECT STATUS

BRIDGE CONSTRUCTION PROJECT TO BEGIN

Beginning on **Monday, June 6th**, Cold Spring Construction Co., a contractor for the Monroe County Department of Transportation, will begin work on a project to replace the bridge on Edgemere Drive over the outlet channel from Long Pond to Lake Ontario (approximately ¼ mile west of Long Pond Road).

This project will be completed in two phases, with a single lane of alternating one-way traffic being maintained on Edgemere Drive using temporary traffic signals and temporary concrete barrier. The new bridge will be a precast concrete arch structure which will eliminate the need for a center pier in the water and also raise the profile of the bridge (and roadway) in order to provide additional vertical clearance on the underside of the bridge.

During construction, the channel beneath the bridge will be closed to all boating traffic. We expect the **channel closure to begin on Thursday June 9th**. In addition, Wake Drive will be closed and vehicular traffic to and from Old Edgemere Drive will be detoured to Lowden Point Road.

Barring any unforeseen circumstances, we expect the project to be completed in early November of 2022. We recognize that this project will be an inconvenience, but we ask for your patience for the protection of our workers.

For updated information on this project, and other Monroe County DOT projects, please visit:
<https://www.monroecounty.gov/dot-construction>

You may contact the Resident Engineer, Tanya Pace, to address any concerns you may have during construction.

(Please note that later this summer the Town of Greece will have a separate REDI project (Resiliency and Economic Development Initiative) on Edgemere Drive to improve the storm sewer system in order to help mitigate flooding. That REDI project is being managed by the Town of Greece and future updates on that project will be provided by the Town.)

PROJECT CONTACTS

Full time inspection staff is on-site daily working with the Contractor. During construction, if you have an emergency, question, or concern regarding the work in progress or another circumstance, please contact our Resident Engineer.
